

To Whom It May Concern:

Hello my name is John, for the pass Ten years I had wear glasses and contact lenses, dealing with dryness and uncomfortable heavy frames when I used my glasses. Until a friend of mine told me about lasik surgery which it was performed at DIAMOND VISION, I never trust this procedure since my eyes where involved, but when I went for my first visit I felt very secure knowing that the doctors and consultants knew very much what they were doing.

When the day of the surgery came they explain what was happening and what will happen after, exactly what they said it happen this is the reason why I choose DIAMON VISION because of there knowledge of the operation.

Now my vision is 20/20 and getting better every day THANKS DIAMOND VISION.

JOHN
