

December 2006

To: Dr. Stetson and his Incredible Staff

Ever since the age of 7 yrs old, I had to wear glasses, and every year I would wish that I didn't. About 2 years ago, I heard about laser vision surgery at Diamond Vision. I took it upon myself to gather some info about the surgery, and Diamond Vision itself. I was ready to go, but unfortunately something would always come up. In May 2006, a co-worker went and had the surgery done. When he returned to work, explained it even further and in better detail to the point where I said, "enough is enough". In August 2006, for my birthday I gave myself the gift of better sight with the help of Diamond Vision. The staff was great, and the surgery itself took about 1 to 2 minutes and now I no longer need glasses. Let me put it this way:

Dinner & movies =\$80

Cruise to Bahamas =\$5000

Better eyesight = definitely priceless

Thank you so much Diamond Vision for better eyesight.

Sincerely

Kevin
