

I have been living with the inconvenience of wearing contacts for my entire adult life. I always had to worry about losing a contact lense showering, swimming, siding, driving, going to a ball game on a windy afternoon or an everyday normality such as looking up quickly into the sky. I decided enough was enough; I visited the Diamond Vision office in NYC after researching medical reports on the web and reviewing the latest Lasik techniques available.. .what a. great decision! Outside of my marriage and the birth of my daughter, this was the single best choice I have made. After my procedure, I had only mild irritation for approximately five hours of which I slept most of it off. After that time and I was up, in the shower and having dinner at my favorite NYC restaurant after which my family went to a show (figured it best not to push my luck with the bright lights-although I felt I was up to it). Two months later, I have 20/15 vision and have thrown away anything related to all the cleaners, cases, back-up lenses that remind me of the days of wearing contacts. Amazing.. .THANK YOU to all the staff at Diamond Vision and Dr. Stetson!
